INTRODUCTION

This guide includes records in the SAGHS Library relating to Scotland in microform (microfiche and microfilm) formats.

Acquisitions since this guide was compiled are listed in the Acquisitions section of the Society journal (The South Australian Genealogist).

The Society Library has a number of microfiche and microfilm (16mm and 35mm) viewers. There is no charge for the use of the equipment.

Reader-printers are available for taking prints from the microform, both from microfiche and 16mm and 35mm microfilm. Staff assistance may be required where microfilm is involved. The cost of prints is currently \$0.70 each.

(Deaths: June quarter 1859 on microfiche)

There are separate quarterly indexes for births, deaths and marriages.

The quarter is that in which the event was registered.

The certificate book number may be used to identify the county in which the registration district is located. From 1837-1851 the code identifying the certificate volume used Roman numerals (I, II, III, etc.) and thereafter it changed to Arabic (1,2,3, etc.) with letters used for subdivisions.

While registration of an event was compulsory there were no penalties for failing to do so until 1874, and many events, particularly births, may not have been registered.

The indexes commence in July 1837 and state the name of the person, registration district and the certificate folio reference.

Death indexes from June 1866 include the age of the deceased.

Birth Indexes from September 1911 include the maiden surname of the mother.

Marriage Indexes are cross referenced with the spouse's surname from March 1912.

example: (13) = period 1 and period 3

Parishes with a commencement date in the index pre 1580 are indicated with the start year in square brackets after the parish name.

An * after the year indicates that the coverage in the first time period to 1700 is not continuous from the date of the first entry.

A parish with no code listed after it is included in all time periods with complete coverage after 1700.

The numbers in brackets eg (234) indicate time periods included in the index for a parish where all time periods are not represented.

An * after the parish name indicates that for at least one of time periods 2,3 or 4 are incomplete in addition to time period 1 if it is included for the parish.

Details of gaps in coverage are given on the first microfiche for each time period.

Several Welsh parishes are also included in the index (Bangor and Holt - Denbigh, Hanmer and Overton - Flint)

Parish Registers

Many church registers have gaps in their coverage, particularly in the 1600's. Many registers have gaps, sometimes for some years, in their entries and the absence of any indication of a gap in the registers does not guarantee that there are none.

MB (Marriage Banns) included for these registers are generally limited to those where the marriage was not performed in the parish.

Molesley's Penny Dole 1799-1823

Commencing in the mid 15th century (following the death of Thomas Molesley) an annual dole of 1 penny per person was paid to each inhabitant of Walsall and Rushall parishes. The practice was suspended in 1824. The dole books list the names of the head of each household together with the amount they received. Occasionally street names are also given.

BIRTHS, DEATHS & MARRIAGES

GRO Indexes, formerly the St Catherine's Indexes

Indexes to the Civil Registration of Births, Deaths and Marriages in England & Wales 1837-1875 [16mm] (in storage), 1876-1994 [mf],
(Deaths: June quarter 1859 on microfiche)

There are separate quarterly indexes for births, deaths and marriages, for events registered in that quarter.

The certificate book number may be used to identify the county in which the registration district is located. From 1837-1851 the code identifying the certificate volume used Roman numerals (I, II, III, etc.) and thereafter it changed to Arabic (1,2,3, etc.) with letters used for subdivisions.

While registration of an event was compulsory there were no penalties for failing to do so until 1874, and many events, particularly births, may not have been registered.

Commencing in July 1837 the indexes give the name of the person, registration district and the certificate folio reference.

Death indexes from June 1866 include the age of the deceased.

Birth Indexes from September 1911 include the maiden surname of the mother.

Marriage Indexes are cross referenced with the spouse's surname from March 1912.

BIRTHS, DEATHS & MARRIAGES

Church Records - Old Parochial Registers (pre 1855) [35mm]

SEE UNDER: AYR, RENFREW and ROXBURGH for holdings of pre 1855 OPR.

The content of the OPR is very variable, and there may be large gaps in the continuity of the registers. The amount of detail recorded may be very sketchy, particularly for marriages and burials, where it may be as brief as a record of fees paid to the church prior to the proclamation of the banns or for use of the mortcloth in burials.

Church Records - OPR Index (Old Parochial Registers: Church of Scotland)

An index to births/baptisms and marriages in pre 1855 Church of Scotland registers.

There may be discrepancies between the OPR Index and IGI resulting from information not yet entered onto the IGI, errors in extraction, entries missed during extraction for the IGI but picked up at extraction for the OPR Index and church registers believed lost but discovered and included in the OPR Index.

There are separate alphabetical indexes for births/baptisms and marriages. The entries have been sorted in strictly alphabetical order, unlike the IGI where variants of surnames have been sorted together. There is no crossreferencing between spelling variants and use of the IGI may help in determining what they are.

In addition to the fiche for individual counties, there is a small Addenda to the Indexes, including entries missed at the time of the compilation of the main index and church registers since found. The Addenda covers all of Scotland, the following parishes having a significant number of entries:

Births/Baptisms:	ABD - Aberdeen - 75th Regiment, ARL - Lismore, DFS - Dumfries, FIF - Dunfermline - North Church, MOR - Elgin, RFW - Kilbarchan, ROX - Cavers,
Marriages:	ABD - Aberdeen - 75th Regiment, AYR - Kilmarnock, FIF - Leuchars, RFW - Kilbarchan, ROX - Cavers, Southdean, WLN - Torphichen

Civil Registration - Death Index 1855-1875 (McKirdy Index)

An index, by county, to death registrations in Scotland.

The information given includes name of the deceased, year, certificate reference (district name, number & certificate number) and other identifying information which may include age, name of father or name of spouse.

Counties: Bute, Clackmannan, Kinross, Lanarkshire (1855-1856), Sutherland

see also under ENGLAND - GRO Indexes of Overseas Births, Deaths & Marriages

International Genealogical Index (IGI) - Births/Baptisms & Marriages

Includes a section "County Unknown"

The 1992 edition of the IGI does not contain all parish registers.

Southern counties (roughly south of the Firth of Forth) still lack many birth or baptism entries from Church of Scotland registers.

Coverage of the period 1855-1875, the first 20 years of civil registration, appears to be virtually complete for all counties.

The microfiche version of the IGI is no longer updated and the most recent version is that on the internet at www.familysearch.org.

PENSION RECORDS

Old Age Pension Claims - Name Index

An index to persons listed in the Old Age Pension Claims for the period 1908-1922.

As civil registration did not commence in Ireland until 1864 the 1841 and 1851 censuses were used as a source of proof of age for pension claimants. Most of the census records for 1841 and 1851 were destroyed by fire in 1922, hence the Old Age Pension Claims contain details that may not be found elsewhere. The OAP Claims records have been filmed by the Genealogical Society of Utah (LDS).

Information contained in the Index includes name, parish (for census), relationship to claimant, age in census. A detailed Guide to the Name Index is included on the microfiche and a printed copy is also available.
